SUMMARY

Backend-focused software engineer with 2+ years of experience building and operating Java services, relational data systems, and CI/CD workflows in enterprise environments at Swiss Re and Fiserv. Proven in delivering microservice architectures, optimizing database performance, and maintaining high-quality automated testing pipelines.

EDUCATION

- Slovak University of Technology (FEI STU)** Bratislava, Slovakia
Bachelor's degree in Computer Science 09/2022 – 06/2026

EXPERIENCE

- Swiss Re** Bratislava, Slovakia
Backend Software Engineer 12/2023 – 04/2025
 - Backend Development:** Designed and implemented Java/Spring Boot microservices for reinsurance contract validation and multi-currency financial transaction processing across distributed business domains.
 - Database Systems & Performance:** Refactored PostgreSQL schemas and eliminated N+1 query bottlenecks in legacy migration workflows, measurably reducing migration script runtime by consolidating redundant database calls into a unified execution model.
 - CI/CD & Deployment:** Owned CI/CD pipeline configuration and managed containerized deployment of RESTful APIs to Azure, implementing automated quality gates to enforce code standards across services.
 - Testing & Reliability:** Built unit and integration test coverage (JUnit, Mockito) for business-critical financial reporting modules, establishing code coverage targets that prevented production regressions.
- IT-Development** Bratislava, Slovakia
Web Developer 02/2023 – 06/2023
 - Frontend Engineering:** Maintained and incrementally improved internal Angular applications, resolving UI/UX bugs to optimize vendor workflows for telecommunication asset management.
 - API Integration & Data Mapping:** Integrated responsive user interfaces with RESTful web services, handling complex data visualization for hardware specifications, real-time antenna status tracking, and infrastructure digital twins.
- Fiserv** Bratislava, Slovakia
Test Automation Engineer 06/2022 – 01/2023
 - Automation Frameworks:** Built automated front-end test suites using Appium and Selenium, covering core user flows and replacing manual regression cycles that previously required full-day testing rounds.
 - Code Refactoring:** Refactored test cases and maintained the framework to improve execution time and ensure reliable CI/CD pipelines via Jenkins.
 - Documentation:** Authored comprehensive technical documentation in Confluence and structured inline code reference guides to facilitate seamless cross-team knowledge sharing.

TECHNICAL SKILLS

- Backend:** Java, Spring Boot, JPA/Hibernate, REST APIs, PostgreSQL, SQL
- Infrastructure & DevOps:** Docker, Azure, Jenkins (CI/CD), Gradle, Git
- Testing:** JUnit, Mockito, Appium, Selenium, JMeter
- Other Languages:** TypeScript, JavaScript, Python, C
- Languages (Spoken):** Slovak (Native), English (C1), German (B1)
